b) Conceptual design and manufacturing drawings and schemes of components, sub-assemblies, and circuits.

- Flooded¹ / EFB²-Batteries: Lead battery with liquid electrolyte.
- AGM³ / VRLA⁴ -Batteries: Valve regulated lead battery with electrolyte immobilized by absorbent glass mat.
- Series connection of six single cells in a single PP container

Figure 1 - Conceptual design of a typical lead battery

¹ Flooded or vented batteries - secondary battery having a cover provided with one or more openings through which gaseous products may escape.

² Enhanced Flooded Batteries - EFB - secondary batteries with additional special design features to significantly improve the cycling capability compared to standard flooded batteries.

³ Absorbent Glass Mat batteries - AGM - VRLA batteries in which the electrolyte is immobilized by absorption in a glass mat.

⁴ Valve Regulated Lead-Acid batteries - VRLA - valve regulated lead-acid batteries are secondary batteries which are closed under normal conditions, but which has an arrangement that allows the escape of gas if the internal pressure exceeds a predetermined value.

c) Descriptions and explanations necessary for the understanding of the drawings and schemes and the operation of the battery.

No further documentation is needed to understand drawings and schemes. For any details concerning operation of the battery refer to safety instructions and user manual.

d) A specimen of the label required in accordance with Article 13.

Batteries are marked with the symbol for separate collection according to Annex VI Part B (defined as well in IEC 60417-6414) and with the chemical symbol "Pb" for the heavy metal Pb content according to Article 13 (3)

Figure 2 – Example of marking with symbol for separate collection according to Annex VI Part B and with the chemical symbol "Pb" for the heavy metal Pb content according to Article 13.

e) List of the harmonized standards and common specification and other relevant technical specifications used for measurement or calculation purposes.

There are no harmonized standards available. There are no measurements or calculations needed to fulfill applicable requirements according to Article 6 (Restriction on substances) and Article 13 (Labelling and marking of batteries).

f) Description of the solutions adopted to meet the applicable requirements.

a) Article 6 (Restrictions on substances)

1. Please see appendix A – 3rd party sample testing report compliance with ELV, REACH & EU2023/1542 ANNEX I requirements.
2. Also, Compliance to requirements of Annex XVII to Regulation (EC) No 1907/2006, Article 4(2), point (a), of Directive 2000/53/EC and Annex I of Batteries Regulation 2023/1542 is guaranteed by material specifications and incoming goods inspections.

b) Article 13 (Labelling and marking of batteries)

An example of the required label is shown in section d).

g) Results of design calculations made and the examinations carried out, and the technical or documentary evidence used

There are no design calculations needed to fulfill applicable requirements according to Article 6 (Restriction on substances) and Article 13 (Labelling and marking of batteries). Examinations concerning restricted substances according to Article 6 are realized by incoming goods inspections.
